SUMMARY

B.Tech Computer Science student specializing in SAP. Passionate about practical software, thoughtful UI, and systems that solve real business problems. Skilled in modern web interfaces, responsive frontend architecture, and enterprise-aware workflows using SAP concepts, ABAP foundations, and data tools. Focused on building products that feel fast, reliable, and easy to maintain.

EDUCATION

Parul University, Vadodara, Gujarat

2024 – 2028

B.Tech CSE (SAP) – CGPA: 7.12

SKILLS

Languages: HTML, CSS, JavaScript, Java, Python, C, SQL

Frameworks & Libraries: React, SAP UI5, Fiori, Flask, Tailwind CSS, Bootstrap, Next.js, Express.js

Tools: Git, GitHub, Firebase, VS Code, IntelliJ IDEA, Eclipse, MongoDB

Soft Skills: Communication, Leadership, Problem Solving, Teamwork

PROJECTS

FocusFlow | *HTML, CSS, JavaScript*

Preview

Developed a productivity-oriented web application to streamline daily task management. Designed a responsive and user-friendly interface using HTML, CSS, and JavaScript. Implemented dynamic task handling features such as adding, deleting, and tracking tasks in real-time. Structured the application workflow to improve usability and minimize user effort, focusing on efficient task organization and performance optimization.

Spark AI | *AI, JavaScript*

Preview

Developed an AI-based application focused on intelligent task handling and automation. Implemented core functionalities leveraging modern technologies to enhance productivity and user interaction. Designed a structured and scalable system with emphasis on performance and usability.

Expense Tracker | *Python, CSV*

Preview

Designed a command-line based expense management system to track and analyze daily financial activities. Implemented file handling using CSV for persistent storage and retrieval of expense data. Developed features for categorization, updating records, and generating summaries, helping users monitor spending patterns and improve financial discipline.

Nexora | *Next.js, Tailwind CSS, Express.js, MongoDB, Gemini API*

Preview

Built a full-stack AI career preparation platform featuring AI mock interviews, ATS resume auditing, coding assessments, and job tracking. Developed scalable backend APIs and authentication systems using Express.js, MongoDB, and Google Gemini API integration. Designed responsive UI dashboards and personalized learning workflows using Next.js and Tailwind CSS for seamless user experience. Focused on performance optimization, clean architecture, and real-world career preparation solutions with scalable application design.
